

DESIGN GUILD · GJENSIDIGE

Guild Sessions Fall 2026

Three arenas, twelve sessions, August through December, 73 designers.

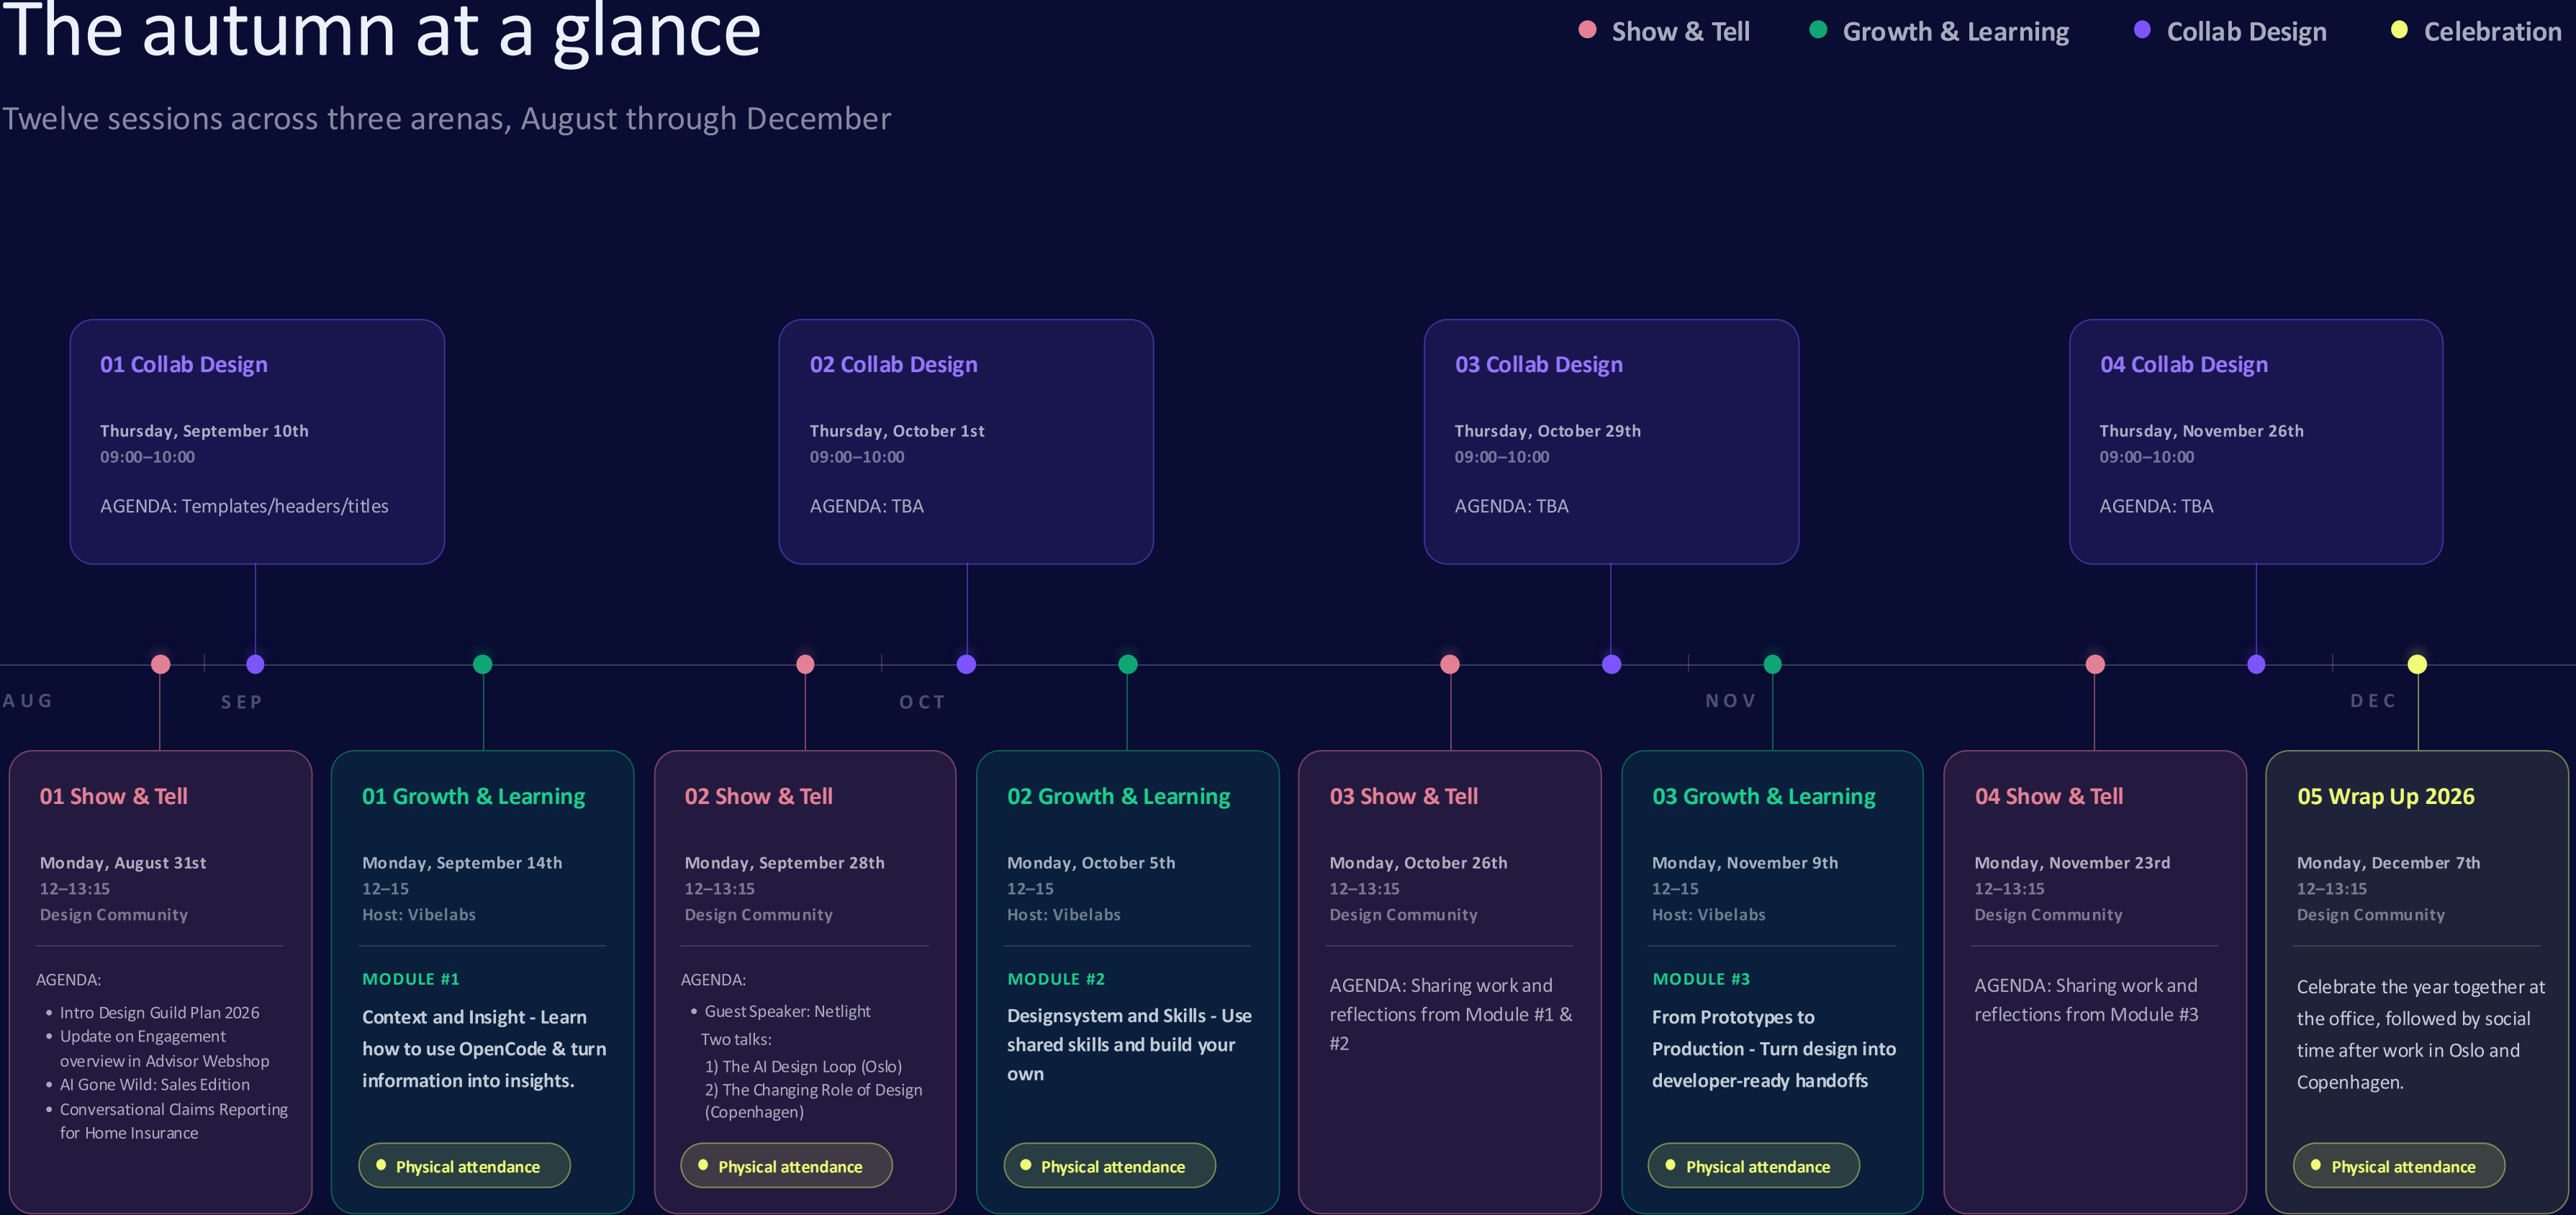

● Show & Tell

● Growth & Learning

● Collab Design

The autumn at a glance

Twelve sessions across three arenas, August through December

THE COURSE · GROWTH & LEARNING

Designing with AI: From Insight to Production

A hands-on programme in three modules, run together with Vibelabs. We start with context and insight, move through design systems and craft, and end with taking AI-assisted work from prototype to production. Every module mixes short input with practical work on our own cases, so what you learn goes straight back into the teams.

01

Three modules that build on each other

MODULE #1

• CONFIRMED

Context and Insight

14 September · 12–15

MODULE #2

• WIP

Designsystem and Skills

5 October · 12–15

MODULE #3

• WIP

From Prototypes to Production

9 November · 12–15

02

Practical info

HOW THE COURSE WORKS

- 3 sessions x 3 hours - more time to dive deep into the material
- The course is a mix of theory and practice
- One shared assignment throughout the course, related to Gjensidige but not product specific. Work alone or in pairs.
- Because all the modules build on each other, it is important to attend all three
- Course material will be shared after each module, plus optional homework

BEFORE YOU JOIN

- Physical attendance in Oslo and Copenhagen
- Let us know if you cannot attend, and remember to accept or decline the Outlook invite (for practical reasons)
- Prepp: Get started with Open Code (Canvas on Slack #guild-design on Slack)

03

Our ambitions

- Improve and increase quality - not just speed
- Build a shared AI practice
- Establish principles for how things should be done
- Strengthen design thinking (not replace it)
- Build confidence and inspire

04

Who you will meet

Our partner and host

Christian von Hanno / Co-founder Vibelabs

Designer, entrepreneur, and AI advisor with 15+ years of experience in service design, UX, and product development. Founder of Atelie, Norway's largest marketplace for contemporary art. Co founder of Vibelabs, where he helps teams integrate AI and agentic workflows into their daily work through practical, hands-on learning.

vibelabs.no

Line Hjartarson / Aline

Designer and developer with more than fifteen years in tech, and runs Aline, an independent design and technology studio. She now works with product teams on MVPs, design system foundations and AI-assisted workflows. She builds with AI every day.
